Changes from the September 2023 list

- W5ETX 147.120 in Tyler is removed. RepeaterBook lists it as a D-STAR repeater that is off the air. The 2023 list showed it as Fusion.
- WX5FL 145.470 in Avinger is removed. RepeaterBook lists it as off the air.
- K5SST 444.275 D-STAR in Sulphur Springs is removed. RepeaterBook no longer lists it.
- Many repeaters are added. The 2023 list left out the 6 meter, 220 MHz, 900 MHz, and DMR repeaters in the area, and several analog repeaters.
- The RB checked column is the most recent date that someone updated or reviewed the entry on RepeaterBook. An old date does not mean the repeater is off the air, but it is worth a listen to confirm.

Only repeaters that RepeaterBook marks as operational and open are listed. Distances and directions are from Tyler. Tones are shown as uplink / downlink. CC is the DMR color code. Please send corrections to RepeaterBook.com so the next list is accurate.
